Get New Windows At-Cost, and Save 10% on Labor

The typical contractor markup for windows is \$100 per window, maybe more if a salesperson is paid a commission.

At AAA Rainbow, we only profit from the work we do, not the materials we use.

We show you the invoice from our supplier, and you pay the supplier directly for the cost of your windows. AAA Rainbow is only paid for labor. It's that simple.

We'll even knock another 10% off our labor costs when you show us this card at the time of your estimate.

If you get an estimate for new windows from another contractor, ask to see their supplier invoice. If they won't show it to you, they could be hiding something - like a huge markup.
